

SS450 PROFILE

The SS450SL roof system is distinguished by its straightforward installation process and exceptional performance. Featuring a 1 1/2" Snap Lock profile combined with the 450SL Clip, it forms a seamless interlocking system that reduces labor expenses. Additionally, the system's concealed fastener and clip design accommodate thermal expansion, resulting in a smooth and flawless finish.

PANEL MATERIAL:

Warranty

40-Year Limited Warranty Summary

Coated Metals Group provides a 40-year limited warranty on its Durapon70® finish applied to aluminum, G90 HDG steel, or Zinc-Aluminum Alloy Steel. The warranty guarantees that the finish will not peel, flake, lose adhesion, and will meet specified color fade and chalking standards when applied as part of a complete Dura Coat system. It does not cover corrosion, damage from environmental factors (e.g., salt spray, chemicals, humidity), improper installation, mishandling, or modifications. If the coating fails, CMG will refinish, replace (including installation costs), or refund the original purchase price for the defective area. To claim benefits, customers must notify CMG in writing within 30 days, allow inspection, and provide proof of purchase. This warranty is non-transferable, void if the property changes ownership, and governed by Wisconsin law. CMG disclaims all other warranties and is not liable for incidental or consequential damages.
